HFA CHINA CHAPTER SYMPOSIUM

A frank and thoughtful panel discussion about the next steps for foreign hedge funds in China. With possible changes to China's QDLP and QFII policies, foreign hedge funds are for the first time going to be able to raise capital in China in RMB and directly participate in China's capital markets. Our forward-looking and distinguished panel of experts and insiders will examine the policies and will attempt to answer the all-important question: what will this all mean for foreign hedge funds and for the Chinese alternative investment community?

This event is complimentary and open to managers, investors, hedge fund service providers, finance professionals, business school students and financial media. Space is limited, please RSVP early:
